POWER 1+
POWER 1 SJ/CF4-10W40
SG/CD-20W50

Crop Multi Grade Motor Oil **Power 1** and **Power 1+** designed and manufactured in accordance with the latest international standards. This product is manufactured with high grade of first based oil (Group One) and the other additives with best quality. It is applicable to all kind of gasoline and diesel engines recommended grade and level of SAE 20W50 API SG/CD and SAE 10W40 API SJ/CF4 in their function.

Other features:

- Easy start at low temperature.
- Oil film stability at high temperature.
- Protects all engine parts from corrosion, oxidation and wear.
- Cleansing the engine system and reducing the sediment.
- Long service life and reduce fuel consumption.

POWER 2
Motor Oil SL/CF-20W50

Crop Multi Grade Motor Oil **Power 2** designed and manufactured in accordance with the latest international standards. This product is manufactured with high grade of first based oil (Group One) and the other additives with best quality. It is applicable to all kind of gasoline and diesel engines recommended grade and level of SAE 20W50 API SL/CF in their function.

Other features:

- Easy start at low temperature.
- Oil film stability at high temperature.
- Protects all engine parts from corrosion, oxidation and depreciation.
- Cleansing the engine system and reducing the sediment.
- Long service life, reduced fuel consumption and reduced friction and wear on engine parts.

POWER 3
Motor Oil SL/CF-10W40

Crop Multi Grade Motor Oil **Power 3** designed and manufactured in accordance with the latest international standards. This product is manufactured with high grade of first based oil (Group One) and the other additives with best quality. It is applicable to all kind of gasoline and diesel engines recommended grade and level of SAE 10W40 API SL/CF in their function.

Other features:

- Easy start at low temperature.
- Oil film stability at high temperature.
- Protects all engine parts from corrosion, oxidation and depreciation.
- Cleansing the engine system and reducing the sediment.
- Long service life, reduced fuel consumption and reduced friction and wear on engine parts.

POWER 4
Motor Oil SN-10W40

Crop Multi Grade Motor Oil **Power 4** designed and manufactured in accordance with the latest international standards and has the best quality for synthetic gasoline engines. This product is manufactured with base oils Group 3 and 4 and high quality additives with the highest level of quality. Better resistance to oxidation; protection against sediment on engine parts; increasing engine oil efficiency at low temperatures and reducing noise is one of the unique features of this product. It is applicable to all kind of gasoline engines recommended grade and level of SAE 10W40 API SN in their function.

Other features:

- Easy start and reduced friction and wear on engine parts.
- Long performance without lowering engine oil and reducing engine noise.
- Optimized coating and Oil film stability at high temperature.
- Cleansing the engine system and reducing the sediment.
- High efficiency in reducing fuel consumption.

POWER 6
POWER 5 SN/CF-5W40
SN-5W30

Crop Multi Grade Motor Oils **Power 5** & **Power 6** designed and manufactured in accordance with the latest international standards and has the best quality for synthetic gasoline engines. This product is manufactured with base oils Group 4 & 3 and high quality additives with the highest level of quality. Better resistance to oxidation; protection against sediment on engine parts; increasing engine oil efficiency at low temperatures and reducing noise is one of the unique features of this product. It is applicable to all kind of gasoline engines recommended grade and level of SAE 5W30 API SN & SAE 5W30 API SN/CF in their function.

Other features:

- Easy start and reduced friction and wear on engine parts.
- Long performance without lowering engine oil and reducing engine noise.
- Optimized coating and Oil film stability at high temperature.
- Cleansing the engine system and reducing the sediment.
- High efficiency in reducing fuel consumption.

ANTIFREEZE / COOLANT

This production is suitable for use in all vehicles and can help your engine run better and longer.

It is formulated to protect against winter freezing and summer boil over and free of phosphates, borates, nitrites, silicates, and amines and compatible with any antifreeze/coolant, regardless of color.

It can be used for cast iron as well as aluminum engines, and also in engine radiators in aluminum or copper.
